

LEAVES PATTERNS

Print

the leaves in your own choice of coloured paper. For a better effect use 120-220g sheets.

You can also print some pages on different kinds of paper to have the same shape in different colours.

Cut

the leaves following the dashed line. For more elaborated shapes, we recommend you use smaller scissors.

Fold

the leaves slightly following the solid line to create a 3d effect and make the leaves more sturdy. You can always add some extra details by drawing on the leaves.

Decorate

the space with your creations! They will create a whole new universe in combination with other studio ROOF products. To get inspired, check our stylist Ines' ideas at studioroof.com/creativityplatform
